Subject: Microsoft settlement

I strongly disagree with the settlement. It is clear they have a monopoly and this settlement does not do enough to change that. Microsoft has in the past used unfair and anti-competitive tactics to establish it's monopoly and shows no sign of changing it's ways. Please reject this settlement and do what is right by American consumers. Competition is good, Microsoft stifles competition, that must change if the technology industry in the U.S. will continue to prosper.
